

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

Claims 1-15. (canceled).

16. (currently amended): An organic light emitting device, comprising at least one layer composed of organic compound including a light-emitting layer, sandwiched between a pair of electrodes, wherein ~~at least one layer between the pair of electrodes contains the light-emitting material for organic light-emitting device as claimed in any one of claims 1 to 15 above~~ the light-emitting layer contains a mixture of a gold complex represented by formula (6) or (7), polyvinylcarbazole and oxadiazole derivative:

wherein R<sup>31</sup> to R<sup>35</sup> each independently represent a hydrogen atom, a halogen atom, a hydroxyl group, a nitro group, an amino group, a cyano group, a mercapto group, a silyl group, a sulfonic acid group, a sulfonic acid ester group, a phosphoric acid group, a phosphonic acid group, or an alkyl group, aryl group, alkoxy group, acyl group, a carboxyl group, an alkoxycarbonyl group or acyloxy group that optionally has a heteroatom, and X<sup>+</sup> represents a monovalent cation;

wherein  $\text{R}^{41}$  to  $\text{R}^{44}$ ,  $\text{R}^{51}$  and  $\text{R}^{52}$  each independently represent a hydrogen atom, a cyano group, a silyl group, or an alkyl group, aryl group or acyl group that optionally has a heteroatom, and Z represents an alkylene, a cycloalkylene, an arylene, or an organic group consisting of two or more of the three groups, same or different, alternately bonded to each other.

17. (canceled).

18. (new): The organic light emitting device according to claim 16, wherein in the gold complex represented by formula (6),  $\text{R}^{31}$ ,  $\text{R}^{34}$  and  $\text{R}^{35}$  are hydrogen atoms,  $\text{R}^{32}$  is a hydrogen atom, a chlorine atom or a methyl group,  $\text{R}^{33}$  is a hydrogen atom or a phenyl group, and  $\text{X}^+$  is tetrabutylammonium salt.

19. (new): The organic light emitting device according to claim 16, wherein in the gold complex represented by formula (7),  $\text{R}^{41}$  to  $\text{R}^{44}$  are phenyl groups,  $\text{R}^{51}$  and  $\text{R}^{52}$  are combined to form a propylene group, and Z is a methylene group or naphthalene-1,8-diyl group.
